

2007 DODGE RAM MOTOR REPAIR

The Dodge Ram motors may come apart and cause the needle not to work. Follow the instructions below to repair. If you need help contact US Speedo 810-244-0909.

1. Remove all of the needles to get to the motors.
2. Lift up the edge of the motor to see the shaft inside.
3. DO NOT OPEN MOTOR.
4. Use a paper clip or small too to shift the shaft back to the center.
5. Snap the motor closed tight.
6. Use a solder tip to melt the top and bottom white case if necessary to keep the motor tight.
